Provider® Nurse Call Systems Leverages Bluetooth® Technology to Unrestrict Caregivers

FOR IMMEDIATE RELEASE

NILES, IL - Feb. 17, 2016 -- As an innovator in Nurse Call Systems, Jeron Electronic Systems, Inc. is excited to announce Bluetooth connectivity for its advanced Provider 790 Nurse Call System. Bluetooth integration joins a wealth of existing technology features of the VoIP-based Provider 790 System which focus on streamlining alerts, communications and workflows between patients and their care providers.

Typically located at the main nursing station for each unit, the Provider 790 nurse console is the central alerting interface for patient to staff and staff to staff communications throughout the nursing unit. Before Bluetooth, a staff member answering calls needed to be at the nurse console. Now, with the Bluetooth integration, staff are no longer tethered to the nurse console and can move freely within Bluetooth range of the nurse console while still being alerted and able to answer patient and staff calls. Multi-tasking while having a hands-free, private conversation is now possible with use of the headset. The wireless connection provides a natural sounding full-duplex audio connection between the answering staff member and the originating intercom station. At any time during the conversation, the answering staff member can return to the nurse console and pick up the handset; the conversation automatically transfers to the console's handset.

"Keeping staff mobile while also remaining readily accessible is an important way that Provider nurse call can positively affect both patient and staff satisfaction; patient calls are answered in a timely manner while caregivers can work on all their other tasks," says Myles Cochran, Director of Marketing for Jeron. Myles added "Our latest Bluetooth integration fits with our ongoing nurse call goals to deliver functionality that improves satisfaction and enhances performance all while maintaining patient safety."

ABOUT PROVIDER® 790 NURSE CALL: Provider 790 is a complete nurse call communication solution, offering clear VoIP digital/full-duplex audio, wireless phone and pocket pager integration, simple touch screen operation, one-touch facility-wide intercom, automated alerting/workflow functionality and a wide spectrum of patient and staff area components – all designed to optimize patient care and staff efficiency.

Provider 790 is backed by Jeron's industry-leading five-year warranty.

ABOUT JERON ELECTRONIC SYSTEMS, INC: A leader in communications systems for the healthcare industry, Jeron Electronic Systems, Inc. is the engineering and manufacturing force behind Provider nurse call systems. Provider systems facilitate communications, speed response times and integrate with a wide spectrum of alerting and notification technologies, all focused on delivering the highest levels of patient care. From its founding in 1965, Jeron has earned a solid reputation for innovation, quality and service. Jeron products are engineered and manufactured in the USA.
