Jeron Electronic Systems, Inc. Celebrates 50 Years in Business

FOR IMMEDIATE RELEASE

January 26, 2015, Chicago, Illinois - Jeron Electronic Systems, Inc., the leading manufacturer of communication solutions, is excited to announce their 50th year in business. Jeron has been designing and manufacturing voice communications and electronic signaling solutions in Chicago, Illinois for the entire span of 50 years. Jeron is proud to still be designing and manufacturing “made in the USA” systems.

Jeron’s beginning was the apartment intercom, entering the industry during the Chicago construction boom of the 1960s. Even the company’s “J” logo is inspired by the very high rise apartments that contained their first generation of building intercoms. The Jeron Provider®, Spectrum®, and Pro-Alert™ Systems are used in a variety of communication and life-safety applications for hospitals, nursing homes, parking garages, schools, and prisons.

Jeron entered the healthcare market in the 1970s, when they offered its original tone-visual nurse call system. Since then, Jeron’s entire line of audio-visual nurse call systems has evolved to incorporate the latest technology to exceed our customers’ expectations. Their acceleration in the healthcare industry is a direct development of their latest Provider 790 Nurse Call and Software integrations. Today, Provider Nurse Call Systems leverages the latest VoIP and SIP technologies to give faster alerting and to deliver information throughout units and floors or an entire hospital campus.

Through the years, Jeron has developed many strong national partnerships with integrators and distributors. Ericka Baran, VP of Marketing, states that, “We are extremely proud to be able to celebrate our 50 years of business. A heartfelt ‘thank you’ goes to all of our customers and partners, past and present, who have worked with us as Jeron grew into a true leader in the communications arena. We have built our business with you for the last 50 years and we are looking forward to many more years of successfully meeting and exceeding customer needs in our increasingly challenging marketplace.”

The stability of Jeron has resulted in many long term employees. Daisy Acre, a 38 year employee of Jeron, says she’s seen a lot of changes over the years. “When I first started the line, there were 3 workers assembling certain stations, those areas have added 7 people in the last 10 years. It’s exciting to see where the company is going next. We know that Jeron is doing well and producing products that facilities are demanding.”

Baran adds, “We share our fifty year anniversary with all the employees, distributors, and customers who have been with us along this journey and we are excited for the future.”

ABOUT JERON ELECTRONIC SYSTEMS, INC: A leader in communications systems for the healthcare industry **for 50 years**, Jeron Electronic Systems, Inc. is the engineering and manufacturing force behind Provider nurse call systems. Provider systems facilitate communications, speed response times and integrate with a wide spectrum of alerting and notification technologies, all focused on delivering the highest levels of patient care. From its founding in 1965, Jeron has earned a solid reputation for innovation, quality and service. Jeron products are engineered and manufactured in the USA.
