

INTEGRATED **NURSE CALL** SOLUTIONS

 **ProAlert™ 570**

## Reliable & Affordable Alerting Solution Supporting the Safety and Well-Being of Your Residents

**Pro-Alert 570 Nurse** Call System is a **flexible** yet very affordable **resident-to-staff alerting system** that scales to meet the needs of any size nursing home or assisted living facility.

Calling stations in key areas let **residents** easily **place calls for assistance or to signal an emergency.** High-visibility LED Dome Light indicators outside each room and consoles in staff areas readily alert caregivers to active calls.

**Resident and staff satisfaction dramatically improves** with the direct connections and timely responses provided by Pro-Alert 570.

electronic systems

## Giving You the Tools to Ensure High Quality Care

Reliability, ease of installation, and minimal maintenance are at the heart of Pro-Alert 570. Just two-wires to each station (and no home-run wiring) keeps installation costs to a minimum. Maintenance is almost non-existent with no batteries or light bulbs to replace. Stations are continuously supervised and staff are immediately notified of any issues.

- **Resident Check-In:** Each morning, residents register their well-being on a station within their unit; caregivers are notified if a resident doesn't respond.
- **Intercom & Audio Paging:** Optional intercom stations facilitate two-way communication between residents and staff. From the nurse console, staff can initiate facility-wide announcements and alerts to residents.
- **Activity & Logging Reports:** All resident and staff interactions are logged to give administrators full records of timely responses; accountability to provide residents' families a peace of mind.
- **Wandering Alerts:** Wandering Management systems easily integrate with Pro-Alert 570; an egress alarm from a wandering resident immediately annunciates at staff consoles and staff duty stations.

Consoles in Key Staff Areas Provide Instant Notification of Resident Calls

## Flexible Alerting and Notification Options

Pro-Alert 570 includes a full complement of bedside, bathroom, and emergency stations giving residents easy access to place calls. Wireless pendants worn by residents allow them to request assistance without being near a calling station.

The active call indicators outside of each resident's room quickly direct caregivers to an active call. For a less institutional look, dome light indicators can include an attractive wall sconce.

Facility-wide, caregivers are alerted to active calls from a variety of duty stations, annunciator panels, and alphanumeric display consoles.

As caregivers move throughout the facility, the Pro-Alert 570 pocket page integration routes resident calls directly to caregivers.

Hallway Indicators: Dome Light and Decorative Sconce Options

Paging Alerts Keeps Staff Mobile and Always In Touch

## Quality Backed by Jeron Electronic Systems

For over 50 years, Jeron has designed and manufactured leading alerting solutions for all types of healthcare facilities. Jeron's factory trained and certified Distributor Network provide 24/7 local service and support ensuring your Pro-Alert 570 Nurse Call System is always operational.

Designed and Made in America by Jeron Electronic Systems, Pro-Alert 570 will provide many years of reliable service. As your assurance of quality and reliability, the system is Underwriter's Laboratories UL1069 listed for Nurse Call and is backed by a 2 year warranty.
