## **Jeron Electronic Systems Inc. will Feature Area of Rescue Systems at NFPA Conference & Expo in Chicago**

### **FOR IMMEDIATE RELEASE**

**June 15, 2015 - CHICAGO, IL** - Jeron Electronic Systems, Inc. will be exhibiting at The National Fire Protection Association (NFPA) Annual Conference & Expo June 22-25, 2015 at McCormick Place in Chicago. The [NFPA Conference & Expo](#) is regarded as the most comprehensive industry event for fire, electrical and building safety. The event is a unique opportunity for the company to reach industry experts and stay current with technological advances in building safety.

Jeron will be highlighting their Pro-Alert™ 480 Area of Rescue System used for emergency communications. Pro-Alert 480 is a life-safety emergency intercom solution typically used in an area of refuge during a fire or other emergency, when an evacuation may not be safe or possible. Occupants can communicate with an on-site or off-site call center until help arrives. This 'area of rescue' is typically located in stairwells in parking structures, industrial and commercial settings, and residential high rise buildings. This system meets Area of Rescue Assistance guidelines that are defined by the Americans with Disabilities Act (ADA) as well as those set forth in the NFPA 101 Life Safety Code and NFPA 72 National Fire Alarm Code.

Pro-Alert 480 features:

- A variety of flexible station options, including highly visible vandal-resistant stations with mushroom-style buttons for easy call placement.
- At-a-glance information for rescue workers to pinpoint the exact location of the caller, allowing them to provide immediate assistance without having to search for the origin of the call.
- Common Cat-5 bus cabling for addressable call stations to conduct hands free, two-way communication with the on-site master station or off-site call center.
- Reduced costs and installation time because of its relatively minimal need for conduit, wire and labor.

#### **About the National Fire Protection Association (NFPA)**

NFPA is a worldwide leader in fire, electrical, building, and life safety. The mission of the international nonprofit organization founded in 1896 is to reduce the worldwide burden of fire and other hazards on the quality of life by providing and advocating consensus codes and standards, research, training, and education. NFPA develops more than 300 codes and standards to minimize the possibility and effects of fire and other hazards. All NFPA codes and standards can be viewed at no cost at [www.nfpa.org/freeaccess](http://www.nfpa.org/freeaccess).
