

FOR IMMEDIATE RELEASE

Jeron Electronic Systems Noti-Fi™ Application and SIP Voice Connection achieve Certified Integration with Spectralink Versity Smartphone

Joint clinical solution delivers secure and reliable data access and enhanced care team connectivity to improve patient care, workflow efficiency and care team coordination

DENVER, CO – March 26, 2019 – [Spectralink](#), a leader in enterprise mobile solutions, and [Jeron Electronic Systems, Inc.](#), a leader in Nurse Call communications, today announced the certification of Jeron’s voice communications and Noti-Fi alerting application with the [Spectralink Versity](#) enterprise Smartphone for alerts and private communications between caregivers and their patients. Seamless, workflow-driven communications powered by this joint solution ensure rapid response and care team collaboration, while empowering caregivers to deliver more personalized, focused care for their patients throughout the day.

“In order to compete amid the growing array of challenges and complexities that define today’s healthcare environments, hospitals and other healthcare providers are seeking mobile solutions that can empower their staff with better information to elevate patient care while enhancing their efficiency and productivity,” said Bill Foster, director Healthcare Business Development for Spectralink. “Spectralink and Jeron address these needs with smarter tools that enable more immediate information exchange among caregivers and better communication between patients and their clinicians, even while away from the bedside.”

With the certification of SIP voice and Noti-Fi alerting for the Versity smartphone, healthcare providers can:

- Seamlessly receive alerts on their Versity smartphone from patient and staff calls placed on the Jeron Provider Nurse Call system
- Securely respond to their patients through direct audio communications to the patient’s bedside station
- Simultaneously alert entire caregiver teams to urgent events such as Code Blue or Rapid Response
- Streamline responses to patients by “accepting” a patient call, saving wasted steps from other caregivers on the team

Two leading-edge technologies; one exceptional solution

Purpose built for the rigors and requirements of today’s healthcare workflows and working environments, the Versity smartphone delivers enterprise-grade performance, superior voice quality and proven reliability in a durable, slim, lightweight design that is easy to carry and use.

Jeron’s SIP voice integration and Noti-Fi Application augment these capabilities with ready access to real-time data that helps clinicians enhance patient care, improve clinical collaboration and drive better outcomes. Deployed through Versity’s open Android platform, Provider[®] 790 keeps

staff mobile while completely connected to their patients and team members for streamlined workflows and direct communications.

“We are very excited to team with Spectralink to give our mutual customers a new level of integration within the Versity smartphone,” explains Ericka Baran, vice president of Sales and Marketing at Jeron. “The Spectralink Versity platform is the perfect enterprise device to provide a single point of integration with Jeron Nurse Call, giving our mutual facilities and caregivers access to information when they need it the most.”

Partnering for success: Spectralink AIMS partner program

The successful partnership and joint solution offering of Spectralink and Jeron is just one of many successes made possible through Spectralink’s Application Integration and Management Solutions (AIMS). Established in 2014, the AIMS program provides a collaborative environment for partners and Spectralink to work together to integrate and enrich solutions for enterprise customers in key industries such as healthcare.

“Spectralink is proud to support a vast ecosystem of application partners in the healthcare industry through our AIMS partnership program,” said Andrew Duncan, vice president of Product Management and Technology Solutions at Spectralink. “By working collaboratively with partners like Jeron, we’re able to enrich and extend the capabilities of our devices to help healthcare organizations enhance patient care, improve workflow efficiency and fuel workforce productivity.”
