

Jeron Partners with Nursing Institute for Healthcare Design (NIHD)

FOR IMMEDIATE RELEASE

July 25, 2019 – Niles, Illinois - - Supporting the Nursing Institute for Healthcare Design (NIHD) as an Industry Partner, Jeron Electronic Systems, Inc. is furthering the mission to advance the healthcare environment for positive patient outcomes by exchanging opportunities in clinical education, distinctive research and innovation, and encouraging technological growth in the healthcare industry.

NIHD's mission is to engage and integrate clinical expertise into the planning and design of healthcare environments. They strive to provide professionals from around the world beneficial and innovative tools on healthcare design or peer education. They also bring the design community, facility managers, hospital administrators and clinicians together to improve clinical work environments for better patient outcomes. In essence, they are shaping the future of healthcare environments through clinical and inter-professional leadership and engagement.

"It is Jeron's mission to provide unparalleled clinical communications and workflow efficiency to healthcare facilities and to ultimately serve their populations with quality care," added Debra Braun, BS, RN, Jeron's Director of Clinical Solutions. "As our solutions in care environment areas evolve, we firmly believe that partnering with NIHD will keep us on the cusp of best practices in design and care innovation as we jointly move toward the future."

Their partnership began when NIHD spent their annual 4-day board retreat at Jeron's corporate office in April. The exchange of ideas came from very skilled leaders in their fields exchanging new insights about manufacturing nurse call communications and the latest topics in healthcare engineering and design. This fall, the Jeron + NIHD partnership will be in full force at the Healthcare Design Expo & Conference in New Orleans, November 2-5.

ABOUT JERON ELECTRONIC SYSTEMS, INC: A leader in communications systems for the healthcare and life safety industries, Jeron Electronic Systems, Inc. is the engineering and manufacturing force behind Provider Nurse Call and Pro-Alert Area of Rescue Systems. These systems facilitate communications, help speed response times and integrate with a wide spectrum of alerting and notification technologies, all focused on delivering the highest levels of safety. From its founding in 1965, Jeron has earned a solid reputation for innovation, quality and service. Jeron products are engineered and manufactured in the USA.
