# Jeron's Enterprise Ready Provider® Nurse Call for an IDN Wide Solution

**FOR IMMEDIATE RELEASE**

**June 3 – Niles, Illinois - -** Interoperability that provides a total integrated solution is a priority for Jeron and their customers. With Jeron's Enterprise ready nurse call solutions, interoperability can extend well beyond a single healthcare facility; leveraging an organization's WAN for an Integrated Delivery Network (IDN) wide solution. Through this IDN wide solution, Jeron's nurse call drives and supports workflow standardization and care efficiencies across an entire healthcare organization.

Jeron's Enterprise solution includes standardized communications, staff scheduling, workflows, mobile device notifications, call activity logging and reporting, and much more. The advanced Jeron Enterprise platform allows organizations to take full advantage of mobile and WAN accessible technologies supporting the growing capabilities of their connected mobile devices. This enterprise solution is secure, scalable, and highly-available so healthcare networks can drive higher levels of patient safety, and patient and staff satisfaction. Over this WAN-based solution, clinicians using smartphones or in-house SIP phones are alerted to active calls and can communicate directly to their patients and other caregivers to coordinate care. All patient and staff interactions are logged to confirm timely responses with actionable data that pinpoints critical needs and response issues that could affect safety and satisfaction.

Ericka Baran, Vice President of Sales and Marketing at Jeron Electronic Systems, Inc. said, "When documenting all interactions across an entire IDN, healthcare organizations can monitor and analyze all Jeron Provider Nurse Call events to confirm the utilization of the system and workflows across all associated facilities; which is key to improving safety, satisfaction and reducing liabilities. The Jeron enterprise solution highlights real-time staff interactions and compares and evaluates staff workflows and benchmarks." Baran added, "Jeron believes in offering the best value to our customers with a focused on a low total cost of ownership (TCO) across the entire IDN. Supporting a low TCO, the Jeron Enterprise solution does not charge for any ongoing SMA (Software Maintenance Agreements) or software subscriptions. There are no surprises or hidden costs with the Jeron Enterprise solution."

Provider® Nurse Call Systems and Integrations improve bedside communications and clinical workflows to eliminate inefficiencies within and across multiple facilities. An overview of the complete continuum of Jeron Provider nurse call solutions can be found at: https://jeron.com/nursecall-systems/

**ABOUT JERON ELECTRONIC SYSTEMS, INC:** A leader in communications systems for the healthcare and life safety industries, Jeron Electronic Systems, Inc. is the engineering and manufacturing force behind Provider Nurse Call and Pro-Alert Area of Rescue Systems.
