Isolation Room One-Touch Communications Streamlines Staff and Patient Communications

FOR IMMEDIATE RELEASE

September 10 – Niles, Illinois - - Jeron is excited to announce a new addition to the Provider 790 nurse call system for instant communication between caregivers and their patients in isolation.

This easy-to-use solution utilizes an intercom station located outside of each isolation room allowing caregivers one-touch audio communications with their patient within the room. Eliminating the need to enter the patient room to communicate also saves caregivers the time spent gowning up and helps reduce the use of Personal Protective Equipment (PPE.)

Jeron's LEAN Healthcare Consultant and Clinical Educator, Stephanie Kuhl (BSN, RN, CPHQ) remarks, "Clinical staff refer to this type of station as a 'PPE Saver.' Jeron is continually creating nurse call equipment that has unique workflow enhancements to save caregivers steps, workflow, and costs."

The Isolation Room station is easily added to any existing [Provider 790 nurse call system](#) without the need to enter the patient room; it is added in the hallway utilizing all of the existing components already within the patient room. The station itself is low profile and designed to be easily cleaned by common hospital cleaning agents.

"Improving the lines of communications for all patients, families and care teams is the mission of Jeron," said Ericka Baran, Vice President of Sales & Marketing at Jeron. "The creation of this new isolation station strengthens the Provider nurse call platform by enhancing care team communications during difficult circumstances."

Jeron Electronic Systems, Inc. provides nurse call for many healthcare markets and facilities. Jeron solutions readily scale from a single critical access hospital to multiple facilities across an entire IDN. Utilizing the latest in VoIP (Voice over IP) and enterprise ready technology, Jeron Provider nurse call meets the needs of patient-to-staff and staff-to-staff communications, alerting, [call activity response reporting](#), and one-touch organizational workflows.

Supporting permanent or temporary pandemic structures or isolation expansions within existing healthcare facilities, the isolation station is ready to ship now. In fact, Jeron's complete line of nurse call systems are ready to ship and will give patients and staff clear communications throughout the entire facility.
