Jeron Electronic Systems, Inc.'s Continual Investment in Nurse Call Enhancements

FOR IMMEDIATE RELEASE

NILES, Ill. - March 16, 2021 -- As the need for more flexible nurse call and communication solutions increases, healthcare facilities want to team with solution-driven vendors that are nimble and can adapt to continual changes in acute and skilled care settings. With over fifty-five years of experience, Jeron has been continuously meeting and exceeding the needs of modern healthcare facilities.

Jeron Electronic Systems, Inc. and their market-leading Provider® Nurse Call Systems already leverage flexible solutions to meet their customer's alerting, communication, and workflow needs with technology that include SIP Wireless Phones, Staff Locating, Local or Enterprise solutions, and much more.

Below are some of the most recent examples of system and platform enhancements:

- **Doorway Isolation Intercom Station:** The isolation intercom stations are easily added to any existing Provider 790 Nurse Call system allowing caregivers to directly communicate with their patients without the need to enter the patient room. The isolation intercom station is easily added in the hallway outside of each patient room and utilizes the existing Provider nurse call components already installed.
- **Cross Platform Provider Nurse Call for seamless integration:** Both the Provider 790 and Provider 700 platforms are fully interoperable to route calls between platforms and sharing the same integrations and activity reporting. The flexibility to use either or both platforms to meet the needs of varied configurations in acute, skilled, and sub-acute healthcare facilities.
- **Jeron's Enterprise Solution:** Supports an IDN-wide solution for centralized management and cross facility features including enterprise-wide call activity reporting and integrations for wireless phones and real-time locating. Jeron's Enterprise solution includes standardized communications, staff scheduling, workflows, mobile device notifications, and call activity logging and reporting.
- **Waterproof IP68 Rated Waterproof Station:** Used in bathrooms, showers and other wet environments. These IP68 rated pullcord stations for both the Provider 700 and Provider 790 platforms meet the IP68 ANSI/IEC 60529) American National Standards and can operate during continuous water submersion.

"Creating and improving existing healthcare processes that caregivers use to care for patients, is what Jeron has been doing from the very beginning," remarks Myles Cochran, Jeron's Director of Marketing. "We are ready to show you our flexible solutions either in person or virtually."

ABOUT JERON ELECTRONIC SYSTEMS, INC: A leader in communications systems for the healthcare and life safety industries, Jeron is the engineering and manufacturing force behind Provider Nurse Call and Pro-Alert Area of Rescue Systems. These systems facilitate communications, help speed response times and integrate with a wide spectrum of alerting and notification technologies, all focused on delivering the highest levels of safety.
